

Board Policy 6820 Automated External Defibrillator (AED) Program

The Board of Trustees of the West Hills Community College District recognizes that from time to time emergencies may arise that justify the use of an Automated External Defibrillator (AED).

The West Hills Community College District has chosen to partner in and implement the Community Cardiac Response Project (CCRP), a program of The Heart Institute at Community Regional Medical Center, Fresno, and agrees to put the CCRP AED policies and procedures into effect.

The goal of this policy is to ensure that the West Hills Community College District is prepared to effectively address ventricular fibrillation incidents that may occur on campus and during athletic hours of practice and competition (per CCCAA Policy P-19-F10 effective July 1, 2011) by installing Automated External Defibrillators (AEDs) at the college campuses that are safely maintained and used. The district's Risk Management Committee shall oversee the AED program.
