

# San Joaquin Center

In a joint effort between the City of San Joaquin and WHCCD, an interior remodel of the Senior Center building began in September 2009. The remodel included the addition of a new restroom, electrical/data upgrades, new carpet, paint, furniture, and equipment. A major roof leak was discovered after the project was completed in January 2010, causing substantial damage and requiring extensive mitigation and repair costs. All water damage has been repaired and furniture has been installed. Additional work was required to provide cooling for technology and it was completed in October 2013. Classes will begin in October 2013.
